AAR	RPT Marks	No.	Gallons	Pounds	Notes
TL	UTLX	59140-59155	8000	100,000	Built Dec 1960; all welded construction
TL	UTLX	85899	8000	100,000	Built Feb 1963

* This series of company owned cars, in operation at the time, were sold to General American Tank Car Company between April-July 1966. Reporting marks were not changed. Roster constructed from best available information; i.e. SHPX lists cars 7753-7779 in April 1954, but only 7755-7757 are known to have been under US&R leasing agreements; some cars under short term lease operated without Union Starch stenciling, some remained painted black. Heater coils were added to cars over a period of years with only USTX 1020-1021 delivered with coils.

Information for this listing came from various issues of the *Official Railway Equipment Register*, photos of the cars themselves, Ed Hawkins, Joe Collias, Richard Hendrickson, Ed Kaminski and the ACF archives at the St. Louis Mercantile Library.
